Objective

- **Senior Backend Engineer (Laravel)**

Backend Developer with 3+ years of professional experience, specializing in building and maintaining scalable web applications using **Laravel**. A Computer Science graduate from the Faculty of Science, I bring strong problem-solving skills, clean code principles, and a solid understanding of software architecture. I'm committed to delivering high-performance backend solutions that align with business goals and ensure system reliability and security. Known for clear communication and effective collaboration with cross-functional teams to drive project success

Experience

Mid-level Backend Engineer — **Aqtar Company** — *Alexandria, Egypt | Remote* — **10/2024 - Current**

- Led backend architecture and development using **Laravel**, focusing on clean code, modular structure, and maintainability.
- Developed and optimized **RESTful APIs** for mobile and web applications, ensuring high performance and security.
- Integrated third-party services (e.g., payment gateways, SMS APIs, OAuth) to extend system functionality and reliability.
- Collaborated with frontend, QA, and product teams to deliver scalable features, resolve bugs, and align with business needs.
- Handled **server setup and configuration via SSH**, including environment variables, permissions, and Laravel optimization commands.
- Created and maintained **GitHub Actions workflows** to automate deployment processes, ensuring consistent and reliable CI/CD pipelines.

- *Projects*: KaleemAi life coaching Solution | LMS

Mid-level Backend Engineer — **WordReward** — *Alexandria, Egypt | Remote* — **10/2024 - 09/2025**

- Maintained and enhanced existing backend systems by debugging, refactoring, and optimizing legacy code.
- Responsible for **server management**, deployment workflows, and environment configuration on shared and VPS hosting.
- Monitored application performance and ensured system uptime through proactive troubleshooting and log analysis.
- Implemented security best practices, including access control, database backups.

- *Projects*: E-commerce application | Booking systems .

Jr.Backend Developer — **Arabic Localizer** — *Alexandria, Egypt | On-Site* — **05/2023 - 10/2024**

- Provided practical backend fixes and enhancements based on business needs without full system rebuilds.
- Collaborated with team members to understand task requirements and deliver effective, maintainable solutions.
- Utilized **Laravel**, **jQuery**, and **GraphQL** to implement specific features and resolve issues within existing systems.

- *Projects*: ERP System | HR System

Information Technology Institute (MCIT) (Intern) — **ITI** — *Alexandria, Egypt | Remote* — **11/2022 - 03/2023**

- Contributed to open-source projects, focusing on both front-end and back-end development using Laravel and Angular.
- *Projects*: Stackoverflow (clone) + Mostaqel (clone)

Education

Bachelor of Science — **Alexandria University** — *Alexandria, Egypt* — **09/2018 - 06/2022**

- Department of Computer Science and Statistics
